Comments:

Fifty pounds of limestone per 1000 square feet is equivalent to 5 pounds (6½ cups) per 100 square feet. (If lime recommendation is greater than 50 pounds per 1000 square feet, increase the per cup rate proportionately.)

197. Prior to planting, incorporate 1 pound (2 cups) of 8-8-8 or 10-10-10 per 100 square feet. Topdress at the same rate when the plants emerge. Keep fertilizer off the foliage or wash off immediately.
198. Prior to planting, incorporate 2/3 cup of 34-0-0 or 1/2 cup of 46-0-0, and 1 cup superphosphate per 100 square feet. Topdress at the same rate when the plants emerge. Keep fertilizer off the foliage or wash off immediately.
199. Prior to planting, incorporate 1½ cup of 15-0-15 per 100 square feet of bed area. If these fertilizer analyses are not available, substitute a 16-4-8 analysis at the same rate. Topdress at the same rate when the plants emerge. Keep fertilizer off the foliage or wash off immediately.
200. Prior to planting, incorporate 2/3 cup of 34-0-0 or 1/2 cup of 46-0-0 per 100 square feet of bed area. Topdress at the same rate when the plants emerge. Keep fertilizer off the foliage or wash off immediately.
